Thank You

This information would help you to customize understand application better

Once again thank you so much for purchasing this product. I would be glad to help you if you have any questions relating to this product. No guarantees, but I will do my best to assist.

We have small team of Designer & Developers, here are some of the Great tools and technologies we use day2day for the development: HTML5, CSS3, jQuery, PHP, Laravel, AngularJS etc.

we also build **iOS & Android Application**.

If you need any Customization Work / Support on this Product or having any project for us. Please feel free to email us at contact@livelyworks.net

Our New Service

We are happy to inform you that we just launched our new service called [ServePHP](#) for managing Servers and Applications for PHP.

ServePHP will help you in creating, provisioning and managing server tuned for PHP. It helps in performing many important tasks like Attaching Domains, Applications, Cron Jobs, Firewall Rules, Auto Deployments and many more without writing single line in Terminal, these tasks are just a click away using simple interface.

Many Advance features like Auto Deployments using Git Push requests, these deployments can be configured conditionally to avoid unnecessary commands executions.

Get started with free account without any credit card information and you can quick sign up via the Google, GitHub, Bitbucket, DigitalOcean, Slack, Gitlab to get hassle free ride to functions & features of site.

To know more about this application please visit our site at the servephp.com

Thank You & Good Luck
